Hi Mark,

Just wanted to see if you were available on Tuesday to continue going over the re-draft. I called Italy today and was told that the plants do not discharge anything to any receiving waters or have any wastewater hauled off-site. Leonardo Arrighi said that all the equipment was working properly. You know, last time I spoke with Allan he had said that the Italian plants were also hauling wastewater to POTW's. How strange. Well, let me know if you want to chat some more or if you would rather wait until after our meeting. Thanks.

Have a great weekend!

-Sharon
